

## ALGAE BIOMASS EXCHANGE -June. 2018 - Update

Needed: Red and/or Brown Macroalgae (100-200 lbs per week)  
Needed: Astaxanthin 400-1000kg Astaxanthin Oleoresin 10% and more  
Needed: Uncracked paste to ship frozen by ground. Can lead to a monthly purchase.  
Needed: Astaxanthin Oleoresin (10%)  
Needed: Astaxanthin Oleoresin 5% uncracked HP biomass astaxanthin (4%)  
Needed: Astaxanthin (1.5%)  
Needed: Chlamydomonas  
Needed: Dunaliella salina  
Needed: Chlorella - cracked wall cell  
Needed: Chlorella Powder  
Needed: Chlorella or Spirulina Fish Feed Grade  
Needed: DHA 350mg per gram  
Needed: EPA 150mg per gram  
Needed: Isochrysis  
Needed: Nannochloropsis - 5 tons  
Needed: Nannochloropsis gaditana  
Needed: Nannochloropsis  
Needed: Organic Spirulina Wet Paste 800 pounds per month  
Needed: Organic Spirulina Dry 500 Kilos/month  
Needed: Spirulina Powder  
Needed: Compounded thermoplastic resin pellets

Available: Dunaliella Salina  
Available: Nannochloropsis  
Available: Spirulina - 60 tons  
Available: Organic Chlorella Powder  
Available: Spirulina Powder  
Available: Nannochloropsis - 4000 liters per month today, expanding to 150 metric tones  
Available: Haematococcus pluvialis (Hp) Biomass (4%) Astaxanthin - One or more tons  
Available: Haematococcus pluvialis (Hp) Biomass (3%) Astaxanthin  
Available: Haematococcus pluvialis Oleoresin (5%) Astaxanthin  
Available: DHA algal oil (550mg/g as FA) first quarter 2018  
Available: DHA algal oil (350mg/g as FA)  
Available: Astaxanthin Oil 5%  
Available: Astaxanthin Powder 5%  
Available: Astaxanthin Oleoresin  
Available: DHA Algae Oil  
Available: Algae biomass pellets - Compounded thermoplastic resin pellets (used for co-extrusion, coatings, compounds and foams)  
Available: Spirulina Powder  
Available: Chlorella Powder  
Available: Haematococcus pluvialis (Hp) Biomass (1.5% Astaxanthin)  
Available: Astaxanthin Oleoresin 10%  
Available: Astaxanthin Oleoresin 5%  
Available: 1.2 - 1.5 tons of HP biomass containing roughly 40kgs of Astaxanthin (Material is frozen, still needs cracked and dried)  
Available: Haematococcus pluvialis (Hp) Biomass (3%) Astaxanthin - 250 kg Available  
Available: Haematococcus pluvialis Oleoresin (5%) Astaxanthin - 100 kg Available  
Available: Chlorella  
Available: Spirulina  
Available: DHA Powder and Algal Oil  
Available: Animal grade Haematococcus pluvialis biomass  
Available: Botryococcus Braunii (type) B  
Available: Feed grade biomass has minimum Astaxanthin potency of 4.5%  
Available: Haematococcus pluvialis (Hp) Biomass (4%) Astaxanthin  
Available: Haematococcus pluvialis (Hp) Biomass (1.5%) Astaxanthin  
Available: Nannochloropsis and Isochrysis  
Available: Natural Astaxanthin Oleoresin 10% - available.  
Available: Phaeodactylum biomass

Note: All biomass and oil samples available with Certificates of Analysis
